

# SCORPIO 45'

## 46'7" Max Lens Height

The technology and functionality of the Scorpio 45' telescoping crane will allow you to achieve your vision without compromise.

Employing the same core technology as the Scorpio 23', the Scorpio 45 was built to reach a remarkable lens height of 47' without sacrificing function or performance.

The Scorpio series of cranes are capable of repeatable arm-articulation, programmable limits for telescopic movement, dampening, and compensation on arc movement in both the horizontal and vertical axis.

## SPECIFICATIONS

### Dimensions

The chassis is 5'10" (1.8 m) long by 5'1" (1.56 m) wide, and minimum 7' (2.13 m) high. From post to nose, the retracted arm length is 7'10" (2.4 m), and 45'11" (14 m) extended.

### Weights

The total all-in weight is 4,850 lbs (2,200 kgs). The crane arm weighs 1,350 lbs (612 kgs), and the combined weight of the post and chassis is 1,585 lbs (719 kgs).

### Ranges

The telescopic range is 38'6" (11.74 m) at speeds up to 8'5" / sec (2.58 m/sec). The arm has a +55° / -43° max tilt angle. The maximum camera lens height is 46'7" (14.2 m) overslung. The post range is 2'9" (0.84 m).

### Accessories

Mountable on the Taurus mobile base or track. A variety of mounts are used to connect heads, including the nose plug, out front, Cineflip, and the Kornercrane Level. HME wireless headsets provide clear communication for crane operation.
